height = 2mdrivers at initial stage, per side...10 x Vifa P11WH 3,2,2,3 taper 4.8ohm... open back at present !!1 tweeter: currently using a pair of KEF T15's, of dubious origin, slightly horn loaded. I don't think they have quite enough sensitivity, but not too bad considering cost !. Tweeter baffle removable with maybe Peerless horn tweeter in mind when funding available !1 Eminence Gamma 12 in 65L sealed (may be vented later to pi-align type, 40Hz tuned, if insufficient bass)cross-over... undefined as yet, been doing the cabinets...big coils for 3-way arriving in next day or so!!Hopefully pics on Thursday evening US time !!
