Subject: Gumby MkI finally gets new clothes !! Posted by Andy G on Wed, 28 Sep 2005 08:25:49 GMT View Forum Message <> Reply to Message

http://users.tpg.com.au/users/gradds/Gumby%20final.JPGThis first image doesn't show the true colours, but does show the whole

speaker.http://users.tpg.com.au/users/gradds/Gumby%20bass.JPGThis is taken closer up and is pretty close to colourDrivers in the array are 10 x Vifa P11Wh + Vifa DX25 tweeter with simple 1st order series x-o at 3K. This is driven by the Dynaco MkIV tube amps. Pre amp is Bryston 1B, Tascam CD or Thorens TT with Audiotechnica cartridge.Bass drivers are Jaycar 12" Carbon Response, crossed in stereo with active x-o at 90Hz driven by an old Marantz sand amp. These are just sooooo listenable at low volume, precise, delicate etc etc, but can of course crank like crazy if required. Mids are just divine !!!

Nice job. Love the non-linear design. Like to see the DIY community take on more sculpted designs like you have.
