Hilf I read your posts correctly, do you still share the Linus plans? I understand the drivers aren't available anymore but I am sure I can find suitable replacements.Would you be kind enough to send to mercier99@sbcglobal.netYour paper is well written!!Thanks for all your sharing,chris

Chris,The midbass drivers (Vifa TC14WG49-08 or TC14SG49-08) for the Linus II may still be available but are no longer currently produced. But they are shown in the Madisound on-line catalog. The tweeter is the Silver Flute YAG20 which is also available from Madisound.I can not recommend any alternative drivers other than these. I'll send you the plans later today.Jim

Chris,Having co-designed the Linus2 with Jim I think you can now get better performance with implementing a different woofer. This will of course change the crossover and cabinet design but I would be willing to do a new design at no charge. This offer always applies to anyone else that's interested. Feel free to email me if you would like further information.

Rick, That will be a great deal for those who want a reasonably priced Linus array. Jim
