There are two replacements for the Alpha LS, the LS-6 and the larger LS-9. The LS-6 is not shipping as a kit for \$1,999. Go to the link below for a thread on the GR Research forum for more information.

I meant to say "The LS-6 is now shipping as a kit for \$1,999". Hit the wrong key. My bad.

I just finished with the LS-9's last week. They really turned out great. The 9's may be the best speakers I have ever listened to period. I can't wait for everyone to hear them.
