Sorry for the confusion but I was in error - the Neo10 won't be released for sale to DIY customers. I thought I had read that it would be; however, BG contacted me and confirmed that it was only available to OEM customers.

so does this mean you are an OEM customer and have access to them for your designs?

I think they would rather see them go into finished designs and not kits; otherwise, Parts Express would be distributing them. I can buy as an OEM just like I do from other companies.

Hi Rick,I was trying to do this off line in a more classy way but:1. Parts Express is an important customer to us and has been great to deal with on a b-to-b standpoint and is an excellent resource to the hobbyists / small business. However, for a number of reasons, we're not ready to go there with this product.2. No, there are a not available to you OEM and being that they are not available to hobbyists on this board, I tend to agree with the comments in the thread below this. I don't really understand the motivations behind your posting this. As always, you're welcome to contact me with any comments or questions.Best regards,Chris BrunhaverProject Manager / OEM SalesBG Radia Corp.(775) 884-1900 x108chris.brunhaver@bgcorp.com
