Have you guys ever used the headphones that gamers usually use? Like the SennHeisers, SteelSeries, Logitech, etc? Their quite pricy and they are said to be excellent for multi-purpose use like listening to music

I just did a search on the internet. This one looks good to me, but it may or may not be in your price range. Its roughly $45. Here is the link:Zalman HeadphonesCrystal

I use a fairly simple Logitech for when I am gaming (mostly FPS types, and WOW). Works fairly well and did not cost a ton. I guess it depends what you want from your headset too since I have seen some pricey ones.
