Does anyone have plans, or know where I can purchase some inexpensive diffusors for the music room? I've seen some on the Decware site, but have no idea how effective they may be. In the meantime I've placed an open shelf wall unit on the front wall behind the speakers and placed lots little odd shaped objects on it. I can definitely hear the difference, but as usual, looking for something better.

Ever tried pointing the speakers towards a wall or corner?

Hi Wayne, yes I have tried that; it isn't exactly what I want to do. :-) It does meet the inexpensive factor.

Jon Risch has a couple of DIY projects. For large rooms
try:<http://www.AudioAsylum.com/audio/tweaks/messages/1725.html> For smaller rooms, try the
Room Lens clone at:
