Can you get these to work well and use to hook up a CD changer? I have only ever used one with a regular portable CD player so the sound was not too impressive.

I think using a Wireless FM Modulator sound good. It ensures that you get the strongest signal strength possible for the clearest and cleanest sound. Try it!

Yeh I am going to go to Radio Shack and see if they still sell the kind they had the last time I looked into it.

Now does this pertain to your radio station period? Is it like an antenna?
