That's a heck of a box! What do you have in there?

The rectangular box is Decware's WO 36 runing a pair of Pioneer TS-W257 DVC 4ohms. Each woofer is connected in parallel at 2ohms load to individual JBL subwoofer amps which gives 300watts at 2ohms.The coaxials are JBL T595 limited series at 150 rms each running on a seperate amp.The combo only needs to whisper in the car but the real use is the 'Boot Camp'. When I open the boot and flip the the box with the T595 rearwards and let it go!!!Also the whole combo is easily removable with just a plug to disconnect.Roland.

That's cool, Roland. It's a portable block party!
