I have the same radio that's on this web page. Can you tell me the model number I need to get a wiring schematic to restore it? THE AIRLINE S.WAVE AM ONE THAT SOMEBODY RSTORED.  
.Thanks Bob

I've restored a couple of Montgomery Wards Airline Radios. You're right that schematics can be difficult to find. Seems Montgomery Wards used a lot of different chassis, so it can make tracking down your model kind of difficult. I tended to treat them like generic five tube models and expect component values that work in other applications. Send me a photo of your radio, or post it here. I'll help you out as much as I can.
