Audiogoners missed the boat. With a week left on my 30 day add and no offers, I hooked up the Scott LT-10 and Foreplay to test the MAIN AMP IN jacks on my old receiver. Nope! But as long as it was out I decided to connect it to the main system. Cancelled the Ad. 70 miles from Columbus in my concrete and steel townhouse I'm getting low-power WOSU like next door! Such a silent background you can hear the ticks, pops and hiss of the LP's they play w/o compression. And of course lots of other stations with 30 year old Terk antenna. Original tubes, all the lights light and no bounce back on the dial string. It's a keeper!

There you go, Bill!!! I'm kinda like that. I have a whole lot of tube radios, but I can't seem to let go of any of them. I almost bought your tuner, and one of these days, I'm going to get one like it. But I'm glad I didn't buy yours, 'cause then you'd be missing it! Wayne
