I recently acquired a Montgomery Ward Airline transonic stereophonic phonograph and AM/FM radio. It is in excellent condition and works very well, even the radio! I was looking for more information about it, but I can't seem to find any. I have an enclosed owner's manual with three models numbers (12535, 12545, 12555), but I can't seem to find anything about them. Does anybody know anything about this?

That's so cool that you got the phono/radio! I'm anxious to see it! Do you know if it uses tubes or transistors?Here's some instructions on posting photos:[How to post photos](#)

That's a really cool console stereo. I'm guessing it is probably uses tubes, which is cool to most of us here in this forum. We all dig on the old retro stuff here. I'm guessing that's probably a console stereo from the late fifties or maybe the early sixties. It looks like it's in excellent shape too!
