I have been searching the internet to try to find out anything about an old midget bakelite & plasticon tube radio I have acquired. The maker is Ramco. The cabinet is tan/gray with a cream front, knobs and station dial. Lettering on dial is red, and RAMCO is on a gold colored plate on the front. It measures 5"H x 7"W 3 3/4"D.On the bottom the schematics says model 1 table radio and it uses 5 tubes and on the chassis it says P-305.Would much appreciate if anyone that has ever seen one would reply to my message.
