I am looking for history and value of above battery radio which is red plastic on both sides with tin in middle and a red plastic handle. Thank you.

It's sometimes hard to determine much information about old Montgomery Ward radios because they sold so many OEM radios labeled as "Airline". I have a few of them and can sometimes narrow down the year they might have been sold by researching the chassis and the tube set. It's kind of a manual process of going through schematics to find similar models from manufacturers that there's more information about.
