Hi, I own this old Radio 1946, 1947 RCA Model 65x1, have not used it in a long time, but would like to make er work again. Problem is can't find the Power Requirements, can anyone tell what voltage is required, i'd love to make er work again.

If it's an American radio that was sold for use in the USA, it requires 110VAC. The power connector will be two thin blades.

Hi, Wayne. Thanks for respondin', this one runs on a, dc battery, never had er plugged in, haven't used er for about 30 - 35 years, the batteries were about 6"long 2"wide & 3" high, just can't remer the voltage. I don't have er here it's at camp, i'll check for AC when i get there again.
