Hi, I have come into possession of my grandparents' Emud Stereophonic radio-phono console. Although German mfg., the writing on it is in English and my understanding is that they purchased it in the 50s. It's in perfect condition and still works. I am wondering if anyone has any ideas about how to find out the value of the piece - I did some Google searches and also looked at Ebay but did not find anything comparable. Any suggestions would be appreciated. Thanks! Kate

The value on stuff like this is almost purely intrinsic. Enjoy it thinking of all the years your grandparents listened to it.
