---

I have a Grundig 7061w with a BSR UA6 turntable. Anyone out there that has one could they check what needle and cartridge they have. I acquired my Grundig without a needle and cartridge and without a owners manual /service manual. Does anyone have one or both of the manuals and would be willing to make a copoy of them or send them electronically. I would be willing to pay something. Thanks

I do not know what kind of needles to use. I did find a site that could help you out.
