Subject: Unidentified RCA Victor Radio Posted by JoseFritz on Fri, 17 Aug 2007 18:17:21 GMT View Forum Message <> Reply to Message

When I first saw this I thought it was an RCA model 45X11. but the chassis is wood and clearly older than that. Eventually I had to admit that I have no idea what model this is. Can any of you wiser radiomen enlighten me? Unidentified RCA Victor Radio

Pretty cool! What tubes are in it? Do you have Rider schematics where you can look through them and possibly identify it by chassis?
