Can someone in here tell me where I can find the model # on an old RCA Victor Radio? I would like to find out what it's worth so that I can sell it. It's about 4' tall and 30" wide with double doors on top, speaker down below. With preset buttons like KSO KFRC, about ten presets total. Any help would be welcomed.

You might look for a label glued to an inside cabinet wall that will have the tube complement and model number. Old radios often had specific radio stations listed on the dial. Was yours like that? Or did it have selectable presets that were labeled by a previous owner?
