Hey,I bought recently Sharps`s high-end line Optonica SM-110, one of their best amps, and I am very satisfied with that old beauty. Sound is just outstanding, warm and detailed. Looking for others opinions, experiences...mike

Hey Mike!The thing is that I do have just that amp lying around... the problem is that a circuit is burned after some exploit in the past (not by me I might add ^^).Anyhow, it really is a great amp and it lying around non-used seems like a huge waste of a great amplifier...My other problem is that I don't have a manual for it... meaning I don't have a "circuit diagram" or what the english translation is... Simply, my question is, do you have a manual for it? If so, would you consider scanning or photograph the circuit chapter or the manual for me?I've been searching like mad for a manual for this specific amplifier and haven't found anything... until now.I would deeply appreciate it...Thanks in advance and all the best!Kristoffer Håkansson, Sweden
