hi! i'm new here. i bought an old Marantz Esotec PM5 that gets really hot whether operating in class AB or A. i want to check its bias for proper setting but i don't have a service manual. all i need are the recommended bias values for left and right channels. thanks.

I wonder if StereoManuals.com might have a service manual for you. If they do, I think it would probably be worth it to you to get.
