Hi,I'm hoping you guys can help me with a URL and maybe a part number for this. I'm not too knowledgable about these things.I'm trying to find a replacement for a can type (FP type) capacitor in a little Magnavox amp. There's not much room underneath to simply use caps other than the can cap. Although there may be room to use a 3 section cap - rather than the current 4 section one - and have the last value (25 mfd, 25 vdc)placed underneath the chassis.Here are the current values:40 mfd 350 vdc40 mfd 350 vdc20 mfd 300 vdc30 mfd 25 vdcThanks for the sources,Mark

Try www.TubesAndMore.com. They carry several multi-caps like that and may have one that works for you.

I've had luck with "Surplus of Nebraska".
