I am assuming this is essentially a US based forum and therefore feel relativly safe to mention speakers spotted on ebay for sale in the UK. These are Coral BX1500 vintage speakers. Are these as good as claimed and can anybody give a idea of their market price? They are slightly damaged but look good.Also i would appreciate it if somebody could tell me if Goodmans Audiom 60 bass 12" is a quality speaker? I have been offered some.cheers Bob
