Hi Everyone! just bought a 1976 Zenith Wedge Stereo with Original Allegro speakers on EBAY. It's not mint but pretty close however the Turntable wheel won't move and the controls on the turntable "Stop," "Start," "Auto" seem stuck..Is there a locking mechanism on these turntables that I am not aware of? I'm screwed the normal looking screws on top to their proper positions..any guesses?  
Click here to see the model

Sounds to me like the selector mechanism is jammed. Honestly, on eBay, it's pretty common to receive something in not-working condition.
