I have a Fisher model 80 T tuner and a Fisher 80 A-Z amp. Both work fine but am not into old music equipment. Can anyone give me a round-about value on these. Both are in real good condition, cabinet is nice as well as finish. They came from an uncle that passed. Also have a huge JBL corner cabinet speaker. It says Signature series but thats about all I could find. Cabinet is 3'6" tall by 2' wide. Any info or suggestions on the above would be greatly appreciated. Thanks, Frank

The 80AZ amp is worth about \$200-300 in working condition, \$400-600 if mint condition. The 80T tuner is worth less than \$100 in working condition, maybe \$150 or \$200 if mint. The 90 was a better unit but still mono. The ones to have are the stereo models, 200, 250, 400 and 500.

You can't sell them here because for sale ads aren't allowed. List them in the Swap Meet section or put them on ebay, or both.

Swap Meet
