Hi,I was wondering if anyone could give me an estimate of the value of a Harmon Kardon CD 191 (Ultrawideband Linear Phase cassette deck) and an Akai AA-A45 stereo receiver with FM tuner for Records, CD, and cassettes. I'm trying to find out if there's anyone out there who would be interested as a collector and audiofile. If anyone has any feedback on how I would get in contact with collectors it would be greatly appreciated. Thanks!!
