Hello all. I just heard about this forum, and thought I would visit. I am a regular poster at www.diystompboxes.com, www.ax84.com, and [ampage](http://ampage.com). Sometimes a poster at 18watt.com and thegearpage.net I like to build my own stompboxes and tube amps. Visit my webpage to see some of my projects.

My Website

I was interested in the articles and projects on your site. Some of the things I noticed in particular were the Octal Fatness 5-7 watt SET amp, the Bias Charts and the Copyright Myths Explained page, among other interesting and useful articles on your site. I see you've done a lot of work with effects too; If you have time, please see my post about phase shifters and phlangers.

Hi Wayne,I love that Octal Fatness amp. It's a great little circuit.I just got those bias charts the other day and immediately posted them at my site.I strive to make the stuff at my site useful and understandable to the average joe. I'm glad that you found some of my ramblings interesting. :)

Oh, about flangers and phasers, I still don't understand how those things work exactly. Maybe someday they will become de-mystified for me...
