Subject: Matching cabinet for Marshall MF350 head

Hi all, I am considering buying the Marshall MF350 guitar amplifier head. Now, the ideal combination for this seems to be the Marshall MF400 cabinet (4x12"), but for the time being I am looking instead for a 2x12" cabinet, which would be easier to carry around. Does anyone have any suggestion on decent matches? How about the Marshall 1936? Is it compatible? Thanks, Haris.
