Subject: 70's Tweed Twin Reverb ???

I bought brand new from a Fender dealer in the late 70's a Twin Reverb(135W) Silverfaced amp in a Tweed covering. The dealer said this was the only one they could get and I've had it ever since. I have never seen another tweed twin of this vintage. Does anyone have any information on this amp??. The inside case still has all of it's original stickers and tags.

I am guessing someone recovered a twin reverb but you never know. Fender did put out a lot of weird one of a kind stuff in the late 60's to early 80's. But other than that I have no idea but I bet its a beauty.
