---

Hi, I was wondering if anyone could give me any advice on buying a new amp. I was going to get a bassman, either a '59 reissue or a 60's blackface. I realise though that with my current setup, I really need something with an effects loop, and although it is not absolutely essential, channel switching would make things alot easier. Are there any amps out there that would be a decent replacement for a bassman, but with these modern features? Thanks.
