Hi all,I am looking to put together a PA and I have a collection of 15's 12's and compression drivers from Peavey, Eminence and JBL. Are there any good speaker plans I can make use of them? Would it be better to just buy used gear from a closed out bar? Thanks,Paul

There's a bunch here but it's dutch but I think you theres a place on the home page where you can convert it to english.

Speaker Store netherlands
