Hi All I run a 5 piece rock band ..(Guitar, Bass, Keys, Drums we mic everything) .. recently I'm having Sub Problems ..It turns out that I burnt out My EV Eliminator Subs .. funny thing is .. one of them was just re-coned by EV .. got it back, but it had a Sort of a Squeak to it. They say that they will re-do the work for free .. but my question is this. Would I be better off with 2 Re-coned Eliminator Subs .. or should I look into putting different replacement Drivers in the Cabinets now that I got the old ones out .. ?It's about \$150 each to re-cone (although I guess one is already paid for) .. I thought about one of these Drivers or something that wont kill me on price ??PEAVEY 18" LOW RIDER SUBWOOFER

(<http://www.partsexpress.com/pe/showdetl.cfm?&Partnumber=294-301>)EMINENCE SIGMA PRO-18A-2 18" CAST FRAME DRIVER

(<http://www.partsexpress.com/pe/showdetl.cfm?&Partnumber=290-427>)or Re-Cone The EV's ???

I replaced mine with black widows. Sounds a lot cleaner and handles more power now. Those EV drivers are weak and you are blowing them out by overloading them. Black Widows (Peavey) were \$129-

Re-cone the EVs and use the proper hi pass filter in the future to prevent further damage. You may need more subs. Or, you might try a center cluster of the subs or corner placement.

It's a bad idea to change drivers without knowing if the replacement is suitable for the existing

cabinet.
