I think Bill's out in the chicken coop finishing up the new Makore veneer for the snowblower. You just wouldnt believe the way the snow shoots from that thing with the right wood. I say use Varnish but I think Bill is fittin to mix up the French polish for this job. Stay tuned and we'll keep ya posted on this and other winter storms to boot.This looks like the new place to call home :)Thanks Wayne! We all owe ya one for the hard work, time and effort you have put forth into this venture. It will be a treat to have a place dedicated to building and cintruction of speaker and other audio related goodies. Bill

Glad to see you here, Bill! I'm really excited about this place, and with the response so far, can just imagine what it's like after the search engines get a hold of it.
