Thanks, Wayne. I've got a list of unit conversion sites in my "favorites" file and have added your chart. No matter how hard I try, I can never think in metric units.

It took me over a year to learn how to think in fraction. When you grow up with the metric system, decimals seem more natural. Now, I have no problems working with fractions or decimals, but still need a calculator to jump back and forth between the two.

Subject: Re: In the nick of time

I had been wondering WTF .359 or .688 was on Hagerman's drilling guide for the Cornet.Thanks for the Skull Sweat.
