Has anyone tried this product? Might be the answer I'm looking for to address all the blank DYI boxes I have in my system. Chassis marking is the only thing I have not figured out yet.

They make a great deal of the fact that the etching process is quick and easy, and it looks like it is. The making of the stencils is not. To get a nice one, it takes considerable labor and substantial equipment. It sure looks like it makes a nice etch, though.Aloha, Poinz
