Nice piece of work ehh Wayne? I am just amazed at the heft and mass of this thing for a pre-amp!

Half measures availed us nothing. Glad you guys are happy with their work. I have been quite pleased with them since they wound my first project. On another subject, the amps, I am purchasing a pair of heathKit W5's that need rebuilt and resurrected. They have nice Peerless 16309 OPT's. 10k a-a to 4, 8 and 16. 20 watts. I'll let you know what sort of deal we can work for a pile of them when you are ready(and rested after the Guinevere project). They'd be nice for anything from 45's to 6L6's and many cool DH valves (and IDH)in between.regards,Douglas

Yeah, that transformer is meaty alright. Rarely have we seen a person fail who has thoroughly followed our path.
