---

This is a repost for any who missed my earlier message seeking those interested in speaker DIY in Wisconsin. Since the forums fill up very fast I am going to repost once a month for a few months. I have compiled a mailing list from those who have already shown interest in having some contact with other hobbyists nearby. To prevent any misunderstanding: No events or meet-ups are currently scheduled in this area. The DIY Wisconsin list is made for the purpose of communication with other hobbyists in Wisconsin and environs. Just send a mail to [lon@athenet.net](mailto:lon@athenet.net) and I will add your name. Here is a list of the places I am posting this message: No doubt I have missed some important ones. Please feel free to mail me with additional locations either for speakerbuilding or Wisconsin to catch areas I may have missed.
