Hey-Hey!!!, Since I have way more ideas than time to build them, waiting for me to open the Iron vault up might take a while. So...if anybody wants to get one of my single transformers cloned and perhaps modified, just set up purchase arrangements with Heyboer and me, and I'll get the example packed off. I'd be doing this anyway, as that was the primary reason for acquiring the collection. There are two tertiary winding OPT's. A Chicago 20W with a 7k6 a-a, and the huge 120W Dynaco A441. There's also a selection of plate:line outputs, UTC LS, some Peerless 20-20 covering from 3k a-a on up to 8k a-a, all to 500, 250, 125 and such. Then there is the standard plate:voice coil collection. Soon to join this group is the Freed Iron as used in the H-K Citation II. There is a real Rat on ebay, I'd rather contribute to acquiring that than taking my clean and functional unit apart. Email me if you want to make some arrangement of getting that amp to the winder. cheers, Douglas

re-statement of the disclaimer: no personal gain, save the expansion of the pool of Iron designs to play with.
