FOR SALE ---- VMPS Super Tower IIa/R. QSO single amp version (toggle switch for bi-amp use), 6 ohms, 17Hz-50kHz -3dB (not plus OR minus, just minus), 101dB/W/m. I bought them new in the mid-80s. Never raced, rallied, or had "Contemporary Rap" music (otherwise known as C-rap -- otherwise known as crap) played through them. Regretfully, they are not going to be making our next move. The speakers are quite large and, from my perspective, unshippable so I'd like to make a connection in the Seattle area.

Did you sell these speakers?
