The WAF has won the battle.My Pi's were originally loaded with all Selenium parts. 1505 15" motors, 205TI drivers and 23-25 horns. I have moved the 1505's to a pair of Altec 828 cabinets with 511B horns and Peavey 22A drivers. In the place of the 1505's, I put in a pair of JBL 2226H's. One needs a dust cap replaced. It does not effect sound at all. I would still replace it though. They shake everything in the house. The Pi's are capable of being bi-ampped.I am looking to get $800.00 for the Pi's and the VOTT's. All 4 for $800.00. I am sure they will have to be a local sale. I doubt I can ship the VOTT's.With that said. I think it is time to start shopping for a smaller package that will pass the WAF.Brian
