Here are several altec compression drivers I have collected. I don't want to sell all of them, but I have more than I can use. So, before they go on ebay: 1. One pair 808 8B great condition, with original altec symbiotic diaphragms. 2. Two pairs 802 8D, both need new diaphragms. 3. One pair 908 8B with original altec symbiotic diaphragms, great condition. 4. one pair 802 8D with altec aluminum diaphragms. 5. One pair 511b, rough condition, (each has a corner off) but great for dampning experiments, vane sawing, etc. If interested please contact at cathouse7@hotmail.com
Thanks, Russellc
