Here are several altec compression drivers I have collected. I don't want to sell all of them, but I have more than I can use. So, before they go on ebay: 1. One pair 808 8B great condition, with original altec symbiotic diaphrams. 2. Two pairs 802 8D, both need new diaphrams. 3. One pair 908 8B with original altec symbiotic diaphrams, great condition. 4. one pair 802 8D with altec aluminum diaprams. 5. One pair 511b, rough condition, (each has a corner off) but great for dampning experiments, vane sawing, etc. If interested please contact at cathouse 7 @ hotmail.com Thanks, Russellc
