Hi,I am a semi-pro cabinet maker and have a pair of horns for sale. These are based on the Isophon cabinet design and use a single R.S. 40-1197 driver in each cabinet. (A Fostex FE-103 may be substituted. If you'd prefer to do this, you may just buy the cabinets. I will lower the price and I'll keep the R.S. 40-1197's for another project.)Cabinets are unfinished MDF, ready to prime, paint or veneer. Heavy. These are much more efficient that the driver specs would indicate. I used a 1.5 watt Decware Zen amp and Bottlehead Foreplay preamp with these very, very successfully. They sound terrific.You must pick up. I'm the NE Pennsylvania area / southern tier on NY state. I could meet you within 50 miles or so.Pictures are available. I can send to your e-mail upon request or if someone will instruct me I can post them here. I don't know how to do it!Cheap, cheap. I need the space! The wife is bugging me! $125 (firm)takes the pair. You may call me at 570-888-3220.Thanks,Cleartitle
