I hired JohnEH from the Bottlehead forum to build this preamp and after completion I sent it to Bottlehead to ensure that it was assembled to spec (it was). I used to use it with my Dynaco vacuum tube amp, but no longer have the amp so I'm selling this. It has the following upgrades: Sweet Whispers volume controls, Anticipation C4S, Gold RCA jacks, HV Snubber with Vishay/Dale resistors, and DIY Cable Foreplay upgrade kit (upgraded Panasonic capacitors and Auricaps). Comes with 3 pair of tubes (RCA Black Tops, RCA Clear Tops, and Telefunken). Wood base is finished in Black Granite. \$250

Subject: Re: Bottlehead Foreplay - Nicely upgraded. Sold.
