Another review pertaining to the 10A Line preamplifier is posted at audiocircle/critics circle/sasaudio 10A- possibly the best kept secret. One can also see other customer reviews and mag reviews for the 10A at: http://www.sasaudiolabs.com/review.htmThen click on either magazine preamplifier reviews or customer preamplifier reviews.Take care.Steve SammetSAS Audio Labshttp://www.sasaudiolabs.com

That's cool Steve. Good reviews by by people that have been around. I'd really like to check one of those out sometime.

Hi Wayne, Thanks. There are 7 people waiting on the tour, but I could add your name to the list if you want. There is a deposit, but is refundable.Take care.Steve

I could probably arrange a listening session for the members at the next Great Plains Audio Club meeting, so let me know if you're interested. You might also want to offer to send one to FredT of the Texas group. He posts pretty frequently in the various forums here.
