Hi guys. I have some miscellaneous Altec stuff that I have been trying to work on for many months. It is now painfully clear to me that I have too many other obligations and projects. It is time to turn them over to someone that will be able to enjoy them. First, I don't have the time to crate and ship anything. If you are interested you must pick them up yourself. I live in a suburb of Minneapolis/St. Paul, Minnesota, USA. Here's what I would like to sell ASAP: - 2 Altec 606 cabinets- Walnut cabinets- The condition is very bad, stains and chips- One baffle is original- One baffle has been butchered.- The baffles are easily removed and replaced, that was one of the first things I had planned to do… - 1 Altec 601C Duplex driver, with N-3000E crossover- The woofer seems to be working- The horn does not seem to be working- The number 391303 is on the mounting flange- The number 2106 is on the back of the cone - 2 Altec Sevilles 847A- These are also walnut, they are 100% original and in very good shape. They have minor scratches and dents but are intact. They contain:- 414Z 12" woofer- 3000G HF Horn- N-3000F crossover- Serial# 391612 (643)- Serial# 391628 (837) It's Christmas! I'm feeling generous! Any and all offers considered. Please reply to this e-mail address: Kajfh01@hotmail.com Thanks everyone.
