For sale Pro PI 7 speakers using all JBL components. This is the Pi 7 Pro design of couple years ago where only JBL2226 and JBL2426 drivers are used. The cabinet is pi pro 7 dimension but I did not built the reflectors because I want to use it with the woofer facing out. It was built with 3/4" MDF and well braced. The cabinet is painted fire engine red color. The crossover is mounted externally to the speaker but, I can move it to the inside if someone wants it that way. The jbl parts are less than 2 years old and are never abused so they are in mint condition. The horn lens is from eminence. I would like to sell the pair of speakers for \$1200 plus shipping. If anyone interested send me email and I will send back pictures.Thanks

An aside for whomever purchases:You can update with a midhorn pretty easy. Components are added, and nothing is replaced or thrown away. You just add a 2012, midhorn and a coil - It's a complete bolt-on upgrade.

Midrange horn upgrade
