Extremely high quality bass. These are the drivers used in the Avolon Acoustic speakers that cost 47,000.00 per pair!!! Ladies and gentlemen, you cannot have live sound in your home with 6" woofers. These cabinets are double walled that can be sand filled if desired and have a rear port that is tuned to 22 hz. Efficiency is about 95 db per watt. 4 ohms Truly "state of the Art" bass system. If you want to take your satellites to another level these babies are just what the doctor ordered! Also have the 6 or 12 db passive crossovers. My ebay handle is jimpcn. Buy with confidence. Thanks for looking. Jim 905-821-2566 after 7:00
