hi this is left power transformer and 2 opt for push pull , from stromb carl amp dont remember imp , free , just pay shipping power transformer for single end amp and opt transformers (small) maybe 3 watts max, this was using a ell80, i gave up this project 8 years ago as could not find tube cheap , dont remember the opt imp, they are very, very musical, i used them for near field full range, 100hz to 15khz , at that time i used vt 25 and such this was sweeter \$20 for all 3 pcs (can give one ell 80 but dont know if its ok) fisher and holden 300va torrid 24 v opt \$20 or all of them \$35 plus shipping good ones got good money , need 3 weeks to go through all the tubes , just too many

Sir;In your ad for "lots of stuff for sale" you listed a "dynaco mark 2st 70 (panor)\$100".Is this the older Dynaco ST-70 Mk II that was built by Panor Corporation?Is it still for available for sale??If so, I would like to buy it.Please contact me by email, or call me at (314) 232-0324 when you can.Thank you.-Pat
