DQ-10's on the stubby legs covers are perf!! Play perfect--I bought from original owner in Dallas---all the manuals and dealer stuff showing updates in XO's--found to be a later version with the update from the factory! I have a B & K 120mSS amp also --So waht I'd like is to sell the DQ10's ($250) and the B&K ($150) or trade for a pre-amp My Apt Holman has died for the 2nd time and I think it is time to move along ---I bemoan ever selling the Counterpoint pre-amp! Dang! Darn! shoot! Let's just even think about shipping thes monters---OK?
